Introduction:

Skype is an online app for using to make phone which are connected to skypes server, and these app is also good for video calls and also for business meetings.

Included Features in App:

I made this clone of skype now as present on AppStore, I tried my best to design a good GUI and make an awesome look during my learning time. So I have done good practice of my app. I make some of the following screens and components for my app (Skype clone). Here is the list below....

Screen Designs:

1. Welcome Screen
2. SignUp page Screen
3. Login Screen
4. Home Screen
5. Chat Messages
6. Contacts Screen
7. Account Screen

Component Made:

1. AppButton
2. AppText
3. Footer
4. Top Header
5. Icon
6. Link Text
7. Profile Pic
8. Screen
9. SigninInput

Screen Shots:

Welcome to Skype

Free HD video and voice calls
anywhere in the worlds
